

Tetanus Toxoid peptide

Product information

Catalog no. 1054

Quantity: 1.0 mg

Description:

This peptide represents residues 830-844 of tetanus toxoid. This sequence has been shown to bind multiple HLA-DR alleles and has been described as universally immunogenic.

Sequence: QYIKANSKFIGITEL

Storage: Store frozen at \leq minus 20°C

Solubility: The peptide is readily soluble in water or phosphate buffered saline. To ensure sterility, filtration of the reconstituted peptide is recommended.
